

Svivva Marketing Strategy

50 Mini-App Traffic System — Step-by-Step Action Plan

Generated March 17, 2026

Phase 1: Foundation Setup

Do this once — takes about 30 minutes

1

Set Your Admin ID

- Go to /dashboard/marketing in your Svivva app
- Scroll to the bottom — find your User ID displayed in the pink footer
- Copy your User ID
- Go to Replit Secrets !' add ADMIN_USER_ID = (your copied ID)
- Refresh the page — you now have full Marketing HQ access

2

Connect GoDaddy Domain

- In Marketing HQ !' DNS/GoDaddy tab
- Enter your GoDaddy API Key, Secret, and your domain (e.g. svivva.com)
- Click Save Credentials
- Paste your Replit deployment URL !' click "Add CNAME"
- Done — your domain now points to your Replit app (propagates in 1-24 hrs)

3

Set Up IndexNow for Bing & Yandex

- In Marketing HQ !' Google Search tab
- Click "Generate IndexNow Key" — this creates a unique verification key
- Click "Submit All URLs to Bing/Yandex" — free, no account needed
- Your pages appear in Bing search results within hours

4

Connect Google Search Console (optional but powerful)

- Go to search.google.com/search-console !' add your domain as a property
- In GoDaddy DNS tab !' Google verifies via the CNAME you already set up
- Back in Marketing HQ !' Google Search tab !' enter your GSC site URL
- Click "Submit Sitemap" — Google starts crawling all your pages

Phase 2: Generate 50 Mini-App Pages

This is your main traffic engine — takes about 15 minutes

5 Open the Mini-App Marketing Wizard

- Go to /dashboard/marketing/mini-apps (or click the purple banner in Marketing HQ)
- You will see a 4-step wizard

6 Step 1 — Enter Your App Details

- App Name: e.g. "Svivva Play"
- Replit URL: your live app URL (e.g. <https://svivva-play.replit.app>)
- Repl ID: your app's slug or any stable identifier
- Description: describe ALL 50 tools in one paragraph — be specific, name every feature
- Click Continue

7 Step 2 — Let AI Discover Your 50 Mini-Apps

- Choose "AI Discovers" (recommended)
- Click "Let AI Discover My 50 Mini-Apps"
- AI reads your description and generates all 50 app names, paths, and descriptions
- Review the list — click the pencil icon to edit any name or description
- Click "Generate X marketing pages"

8 Step 3 — AI Generates All Landing Pages

- Click "Generate all 50 pages with AI"
- Watch the live progress bar — AI writes each page in batches of 5
- Each page gets: unique headline, 2 content paragraphs, 3 benefits, FAQ section, SEO meta tags
- Each batch is automatically submitted to IndexNow as it completes
- Pages go live instantly at yourdomain.com/{tool-name}

9 Step 4 — Generate Comparison Pages

- Enter your main competitors (comma-separated)
- e.g. "GarageBand, FL Studio, Ableton, Logic Pro"
- Click "Generate comparison pages"
- AI writes "{Tool} vs {Competitor}" pages for your top 10 tools
- These rank fast — comparison searches have buying intent

After running this once, you will have 50+ landing pages + up to 10 comparison pages, all with unique content, FAQ schema, internal cross-links, and SoftwareApplication structured data. Google can discover and index all of them from your sitemap automatically.

Phase 3: AI Content Autopilot

Run this weekly to compound your traffic

10 Run AI Autopilot for Blog + SEO Pages

- In Marketing HQ !' AI Autopilot tab
- Choose mode: Conservative (3 pages + 2 posts), Balanced (5+3), Aggressive (8+4)
- Click "Run AI Autopilot"
- AI discovers untapped keywords, writes landing pages + blog articles
- All new URLs submitted to IndexNow automatically — done in ~60 seconds

11 Generate Social Media Posts

- In Marketing HQ !' AI Autopilot tab, scroll to Social Posts

- Click "Generate Social Posts"
- AI writes ready-to-post content for Twitter, LinkedIn, and Reddit
- Copy and post manually or schedule with Buffer/Hootsuite
- Each post links back to one of your 50 mini-app landing pages

Phase 4: Google Direct Indexing (Advanced)

~2 hrs setup, biggest long-term payoff

12 Create a Google Cloud Service Account

- Go to console.cloud.google.com !' create a new project
- Enable "Web Search Indexing API" and "Google Search Console API"
- Go to IAM & Admin !' Service Accounts !' Create Service Account
- Download the JSON key file
- In Google Search Console !' Settings !' Users and permissions
- Add the service account email as Owner

13 Connect to Svivva

- In Marketing HQ !' Google Search tab !' paste your JSON key in the text box
- Click Save
- Click "Submit All URLs to Google Indexing API"
- Googlebot visits all 50+ pages — typically indexed within minutes
- Every new page you create in future will auto-notify Googlebot

Weekly Routine (10 minutes)

Compounding traffic over time

Every Monday:

- ' Run AI Autopilot on Balanced mode !' new SEO pages + blog posts
- ' Copy social posts !' post to Twitter/LinkedIn/Reddit
- ' Check Google Search Console !' any new keywords ranking?

Every Month:

- ' Run Mini-App wizard again for any new tools you've built
- ' Generate more comparison pages with new competitors
- ' Review Analytics !' which pages drive the most sign-ups?

Quick Reference — Where Everything Lives
